### **AT&T Wireless Store Burleson, Texas**

*Of the many AT&T Wireless stores done by RWA across Texas, the Burleson store was unique in that the lease space did not fit any of the prototype plans in the corporate design standards. We designed the corner lease space to admit light into the space from the usually non-existent side wall, while creating additional display space. The streetscape was also enhanced by not having the windows blacked-out, as was typically done.*
