Addition to Home Hospice of Grayson County Sherman, Texas

The need for HHGC to more than double their existing facility is rooted in the burgeoning demand for their valuable and compassionate services. RWA is pleased to be able to help HHGC stay abreast of the demand, while adding space which is functional and a pleasant place to work. The open-office space dominating the addition has a full height glass wall facing north, which provides natural light into the space and a view to a landscaped courtyard on the exterior.
